Frontend Software Engineer | Full-stack Engineer | TypeScript, React | Scalable & Accessible UI Systems

Full stack Software Engineer with **3+ years** of experience building scalable, high-impact UI platforms used by **100k+ users**. Specialized in TypeScript-based frontend systems, performance optimization, testing, and design-system-driven development. Experienced collaborating with UX and Product to deliver reliable, accessible, and production-grade user experiences.

CORE SKILLS

Frontend	TypeScript, Javascript, React, Next.js , Jest, CSS, Jest, Cypress
State & Async	MobX, Hooks, Async data flows, Responsive UI, Localization
Backend	Node.js, Kotlin, Java, Spring Boot, REST, GraphQL APIs, gRPC, SQL

PROFESSIONAL EXPERIENCE

Expedia Group, Seattle, WA | Software Engineer II

May 2022 – Present

Unified Partner Account Management (Core Ownership)

- Owned end-to-end delivery of critical partner workflows like Email Updates, Auth, MFA, Disable & portfolios, using React, TypeScript, & GraphQL APIs, powering 100k+ users & achieving a **90% feature adoption rate** across global partner portals.
- Designed and implemented scalable UI architectures for authentication and dashboard experiences, optimizing rendering, state management, and async data flows to support high-traffic, multi-region usage.
- Improved release reliability through progressive deployments, feature flags, sidecars, & secure secret management.

Frontend Engineering

- Built responsive, accessible UI components using modern state management, lazy loading, and rendering optimizations, improving perceived performance and preventing edge-case UX failures in sensitive flows.

Testing & Reliability

- Increased UI reliability by expanding Jest unit and Cypress E2E **coverage** to **92%**, catching regressions in complex auth, email, MFA, OTP and form-driven flows before production releases.
- Diagnosed and resolved production UI issues as L3 on-call engineer, tracing frontend failures using logs and metrics, and contributing RCA findings that reduced support requests by **~20%**.

UX + PM Collaboration

- Partnered closely with UX designers and PMs to identify UI friction using analytics and localization insights, iterating on component behavior and layouts to drive user experience improvements for a critical account feature.
- Co-led a company hackathon project prototyping a React/TypeScript experience with *maps & carousel* for cultural events + *AI-assisted itineraries*, & collaborated with Product & XD to pitch traveler engagement & booking inspiration.

Global Traffic Technologies, Minneapolis, MN | Full Stack Engineer

June 2021 – April 2022

- Built and optimized backend APIs and async workflows using AWS Lambda, ECS, API Gateway, CloudFormation, DynamoDB, ElastiCache, and Kinesis, reducing latency and operational cost while improving responsiveness and reliability of user-facing interfaces

Moadat Ltd., Mumbai, India | Web Developer

August 2018 – October 2018

- Used fact-finding and **Agile** methodologies to develop & deploy an e2e *e-commerce* website using PHP, **MySQL**, Bootstrap, JavaScript and Apache, storing **500+ product inventory**, enhancing brand visibility and online customer reach.

PERSONAL PROJECTS

[AI Travel Itinerary Planner](#)

January 2026

Developing an **MCP** based **AI-powered** travel itinerary planner using **Next.js**, TypeScript, **Map** APIs, and **OpenAI**, to assist users in decision-making workflows, demonstrating **GenAI-driven UX** and rapid prototyping.

EDUCATION

New York University, New York, NY | Master of Science, Computer Engineering

May 2021

Coursework: Data Structures & Algorithms, Cloud Computing, Distributed Systems, Internet Protocols, Machine & Deep Learning.

University of Mumbai, Mumbai, India | Bachelor of Science, Computer and Information Science

July 2019
