Full-stack Development | **Frontend** Development | **Backend** Development | **Native AI** Engineering

Product-focused engineer building user-facing experiences with React/TypeScript and applied AI workflows (LLM-driven UX, verification, and safe fallbacks).

Experience in shipping production features at scale (100k+ users) and rapidly prototyping AI-assisted tools.

CORE SKILLS

Frontend	React, TypeScript , Next.js, MobX, lazy-loading, accessibility/responsive UI, Jest/Cypress.
Backend	Node.js (Hapi), Kotlin, Java , Spring Boot, REST/GraphQL , gRPC, SQL, Postgres, Queues.
Cloud & DevOps	Docker, Kubernetes , CI/CD, AWS (<i>EC2, ECS, Lambda, S3</i>),
Applied AI	OpenAI, Codex, Claude code, prompt engineering, context-window/token optimization, RAG, and Vector Database.

PROFESSIONAL EXPERIENCE

Expedia Group, Seattle, WA | Software Engineer II May 2022 – Present

Unified Partner Account Management (Core Ownership)

- Owned end-to-end delivery of critical partner workflows like *Email Updates, Auth, MFA, Disable & portfolios*, using React, TypeScript, and **GraphQL** APIs, with a **90% feature adoption rate**.
- Designed resilient **identity-synchronization logic** across several partner systems & implemented OTP based step-up MFA for sensitive operations, taking ownership of **45%** identity-related bugs & inconsistencies.

Architecture & Scalability

- Owned production releases using Git-based **CI/CD** workflows with Spinnaker & **Kubernetes** in a distributed **microservices** environment for multiple services serving **100k+ users** across different EG partner portals.
- Improved release reliability through progressive deployments, feature flags, sidecars, & secure secret management.

Quality & Reliability

- Improved frontend quality & release confidence by adding **94%** unit test coverage with **Jest** and end-to-end test suites with **Cypress**, to catch regressions in CI before production releases.
- Acted as L3 on-call engineer & **SME** for multiple services, independently diagnosing and remediating **production issues**, and authored several *RCA* docs to strengthen system reliability & **reduce support requests by ~20%**.

Product Innovation (Hackathon – AI Travel UX)

- Co-led a company **hackathon** project prototyping a **React/TypeScript** experience with *maps & carousel* for cultural events + *AI-assisted itineraries*, & collaborated with Product & XD to pitch traveler engagement & booking inspiration.

Global Traffic Technologies, Minneapolis, MN | Full Stack Engineer June 2021 – April 2022

- Built and deployed scalable backend APIs and batch workflows using **AWS Lambda, ECS, and API Gateway**, guided by design docs and cost-optimized architecture decisions.
- Reduced latency and operational costs** by automating infrastructure with *CloudFormation*, migrating workloads from *DynamoDb* to *ElastiCache*, and implementing an asynchronous logging pipeline with *Kinesis Firehose, S3, and CloudWatch*.

PERSONAL PROJECTS

AI Travel Itinerary Planner February 2026

Developing an **MCP** based **AI-powered** travel itinerary planner using **Next.js**, TypeScript, **Map** APIs, and **OpenAI**, to assist users in decision-making workflows, demonstrating **GenAI-driven UX** and rapid prototyping.

AgentPortal (Next.js/React, API Routes, Postgres) March 2026

Built [AgentPortal](#) + [PDF Highlighter](#): user-facing React/Next.js + TypeScript prototypes with Supabase **OAuth** auth, invoice extraction, & PDF source field highlighting, with scalable app structure and deployed live via CI/CD on Vercel & Github Pages.

EDUCATION

New York University, New York, NY | Master of Science, Computer Engineering May 2021

Coursework: Data Structures & Algorithms, Cloud Computing, Distributed Systems, Internet Protocols, Machine & Deep Learning.

University of Mumbai, Mumbai, India | Bachelor of Science, Computer and Information Science July 2019
